Svelte, React.js, Vue.js, TailwindCSS

Hybrid / Full-Stack

SvelteKit, Next.js

Deployment

Docker, aaPanel, Hestia, Cloudflare, Firebase, AWS, Linux Server Management

Other

Git

Education

Punjab College Gujrat

Intermediate Computer Science Degree
Sept 2020

Interests

Hobbies

Gaming, Custom Computers, Low-level-programming, Embedded Systems

Languages

English	Urdu
Fluent	Native

I'm a web developer who has worked on various projects in professional and hobbyist environments. I've contributed to & built open-source software and commercial software with thousands of customers. I love experimenting with technology, software and hardware alike.

Experience

FunFox Program

September 2025 - Present

Frontend Developer

<https://funfoxprogram.com.au/>

Contributing to a large scale gamified online learning portal for students.

Nexthon Technologies / BitFlan

March 2020 - August 2025

Web Developer

Full-time

<https://bitflan.com/>

Created software with thousands of customers & in-house frameworks for products.

Freelancer

2019 - Present

Web Developer

Part-time

Dynamic jobs for hundreds of clients ranging from small fixes to large-scale contracted application development.

Featured Projects

CyberTools

August 2022

Utility based self-hostable SaaS Platform

[Envato Marketplace Page](#)

I led the development and deployment process for this project. It is a Build-your-own-SaaS platform with more than 100 tools. It was hand-picked by the Envato Market and featured on their homepage. In addition to developing this project, I also:

- Developed the in-house CMS solution that powers this project and others.
- Developed a custom DRM solution for license validation that this project and others use.

CORONASTATS

April 2020

Coronavirus Statistics Tracker & Visualizer

[ProductHunt Page](#)

A cases and statistics tracker that was used by millions. It reached #1 Product of the day on ProductHunt.

It was a React SPA hosted on a public Amazon S3 Bucket using Cloudflare DNS. A Linux server running an instance of MySQL and PHP was used to parse and prepare data for visualization.

I received positive messages and donations from thousands for creating this project.

NAV TTC

Mar 2022 - Aug 2022

Web Development Instructor

Adan I.T Center Gujrat

I lectured a class of University Students and introduced them to real-world skills that would allow them to speed-up their careers as Professional Web Developers.

This program was introduced by the government and I was reached out to work as an instructor.
